## Experience

July 2023 - Present Udaipur

Front End Developer  
Cogmus

"I serve as a front-end developer responsible for implementing designs across our portfolio of 7 products, which include investment apps, dashboards, and educational platforms. Leveraging the latest technologies like Next.js and React.js, I focus on enhancing user interfaces, integrating new features, and optimizing user experience to drive conversion rates. Working closely with our product designer, I ensure our applications deliver better performance and a smooth user experience."

Sep 2022 - Jan 2023 Udaipur

Web Developer - Intern  
Vlite Technology

At Vlite Technology, I worked on front-end and back-end development using HTML, CSS, JavaScript, React, and MySQL. I collaborated with teams, utilized Git for version control, and employed Agile methodologies. This role enhanced my skills in building responsive, scalable web applications and solving technical challenges
